ENIOLA OLAJUGBAGBE

Frontend Engineer | React • Next.js • TypeScript

Lagos State, Nigeria | +234 805 967 3824 | olajugbagbeeniola12@outlook.com

Portfolio: enioladev-seven.vercel.app | GitHub: github.com/codemonk-silver | LinkedIn: linkedin.com/in/eniola-olajugbagbe-058aa2281

PROFESSIONAL SUMMARY

Performance-driven **Frontend Engineer** with 3+ years of experience engineering scalable user interfaces, reusable component ecosystems, and high-conversion client runtimes. Expert in **React.js, Next.js, TypeScript, JavaScript, and Tailwind CSS**, with specialized proficiency in bridging the gap between complex interface designs and production-ready system logic. Demonstrated track record optimizing Core Web Vitals, streamlining complex application state lifecycles via Zustand and Redux Toolkit, and implementing rigid component schemas to ensure high scalability and seamless global browser performance.

TECHNICAL SKILLS

Core Frameworks & Languages:	React.js, Next.js (App/Pages Router), TypeScript, JavaScript (ES6+), HTML5, CSS3
State & Data Management:	Redux Toolkit, Zustand, Context API, React Query, Client-Side Cache Optimization
UI & Styling Frameworks:	Tailwind CSS, Styled Components, CSS Modules, Framer Motion, Figma-to-Code Pipeline
CMS & E-commerce Systems:	WordPress CMS Engine, Elementor Core Architecture, Custom PHP Plugins, WooCommerce API
Toolchains & Environments:	Git, GitHub Version Engine, Vercel Core Runtime, Netlify API, Chrome DevTools profiling, Postman
Performance Engineering:	Core Web Vitals Tuning (LCP, CLS, INP), Bundle Tree-Shaking, Lazy Loading, Async Rendering

PROFESSIONAL EXPERIENCE

Freelance Frontend Engineer — June 2024 – Present

Remote / Contract

- Built and deployed responsive production web applications with **React, Next.js, TypeScript, and Tailwind CSS**, delivering reusable frontend architectures across multiple client projects.
- Redesigned application state architecture with **Zustand and Context API**, eliminating unnecessary prop-drilling and **reducing runtime re-renders by 34%**.
- Built a reusable library of accessible UI components for forms, navigation, layouts, and dashboards, reducing duplicated frontend implementation and improving consistency across projects.
- Extended WordPress and WooCommerce platforms with custom PHP plugins and integration hooks, enabling tailored storefront functionality beyond standard CMS capabilities.
- Improved **Core Web Vitals performance** by applying code-splitting, lazy loading, and asset optimization to reduce unnecessary browser payloads and improve page responsiveness.
- Integrated REST APIs, third-party messaging services, and payment gateways to connect frontend workflows with production backend and transactional systems.

UI Software Developer — 2021 – 2023

Tech Agency Ecosystems & Product Labs | Lagos, Nigeria

- Translated complex **Figma designs** into responsive, accessible production interfaces, maintaining visual fidelity across desktop, tablet, and mobile breakpoints using semantic HTML5, CSS3, and JavaScript workflows.
- Expanded and maintained shared React component libraries across multiple cross-functional projects, improving UI consistency and reducing duplicated implementation workflows.
- Resolved cross-browser compatibility and responsive layout issues across production interfaces, neutralizing viewport anomalies under strict sprint deadlines.
- Improved onboarding and retention experiences by optimizing client-side validation, form flows, and interface layouts to reduce friction during key user journeys.

Technical Support & Customer Systems Analyst **April 2025 – Nov 2025**

Dove Tech World | Lagos, Nigeria

- Provided advanced client-facing technical diagnostics, evaluating database connectivity failures, runtime account anomalies, and content deployment errors.
- Documented structural platform errors and routed systemic visual display bugs cleanly to internal engineering crews via precise replication procedures.

SELECTED PROJECTS & ARCHITECTURES

Tick4All (Enterprise Scale Event Routing System)
Spearheaded a responsive transactional browser environment utilizing React.js and CSS modules. Automated continuous localized routing tables mapping seat reservation status variables directly into real-time transactional hooks.

Fintech Wallet Micro-Interface Architecture
Developed an asynchronous client dashboard platform displaying live balance indicators, historical transaction pagination arrays, and identity verification modules with comprehensive error boundaries.

PalmStore Omnichannel Engine Concept
Converted an ecommerce structural framework mapping dynamic catalog filtration workflows, stateful multi-item cart caches, and robust analytical customer tracking steps.

EDUCATION & CREDENTIALS

Higher National Diploma (HND) in Computer Science **2019 – 2023**

Federal Polytechnic Ede | Osun State, Nigeria
